

## Couleur Diamants

*Elabored from Couleur Diamants*

2008, August

*Birthstones are traditionally offered in present to the birth on a jewel. Stones symbolize the born month of the person to whom it belongs. Of biblical origin, this tradition was immortalized through ages. In 1912, national American association of Jewelers adopted an official list of born stone. There is also a version of Birthstones associated with the diverse signs of the zodiac.*

*The properties of the gemstones divide into categories in connection with colors. The color of a diamond evokes the love and the elegance, the union of an ultimate proof of love, success and prestige.*

### Diamonds of the months "Birthstones"

<i>Months birthday</i>	<i>Gemstones birthday</i>	<i>Color</i>	<i>Natural Color diamonds</i>
